

Client: University of Oregon

Size: 130,000 SF

Cost: \$200 million

Scope of Services:

Special Inspection & Materials Testing

Project Highlights & Specifications

Dates of Service: 2012 – 2013

- Casanova Center expansion project
- 130,000 SF operations building
- 25,000 SF weight room
- Underground parking structure of approximately 130 cars
- Renovated practice facilities with one enhanced grass practice field and two new synthetic turf surfaces

Project Description

This project is a state of the art football facility that provides the functionality and advanced technology to support the Oregon Ducks into the future. The facility includes coaches offices, nine dedicated football position meeting rooms, two team video theaters, offense and defense strategy rooms as well as a larger conference suite for the entire coaching staff. The centralized area is flanked by office and locker facilities for coaches, staff and student-athletes, an advanced video editing and distribution center, a full-service dining facility that will seat approximately 250 guests and available to all members of the University community, as well as a new 25,000 SF weight room overlooking three new football practice fields.

Scope of Services

Special Inspection & Materials Testing

- Reinforced Concrete
- Post-tensioned Concrete
- Reinforcing Steel
- Structural Steel Erection
- Structural Masonry
- Proprietary Anchors
- Spray-Applied Fire Resistive Materials
- Ultrasonic Testing of Welds
- Load Testing of Components
